

Friends and Cattlemen!

Welcome to our 49th Annual Production Sale! Thank you again to new and old customers for taking an interest in our sale offering! We are proud to be able to offer you a tremendously stout and high performance group of bulls that are rugged and good footed to cover the ground during breeding season. We are excited about the future of the livestock industry and we know these bulls will go on to add value, performance, profitability, and extra pounds when you go to sell your calves. Dohrmann Cattle Co. sired calves continue to top the market!

The genomic-enhanced EPDs in this sale catalog are powered by Neogen. We've made the investment in the world's most advanced DNA testing for seedstock cattle. This information provides you extra confidence in the product you are purchasing and allows all of us to do a better job improving genetics and profitability. Keeping your operation profitable is one of our top priorities. We feel it is very important to make sure the parentage is correct through DNA testing.

The bulls have been fed a high roughage ration and long hay with no silage. They have been developed to maintain structural soundness and hoof development.

Bulls left for wintering will have a semen evaluation before delivery and we will be retaining a 1/3 semen interest in all our bulls.

All bulls are fully guaranteed to be breeders and are sold under the terms and conditions of the American Angus Association.

The bulls have been ultrasound scanned by Jason McLennan, Belle Fourche, SD. Data will be available sale day.

Thank you for taking an interest in our cattle! Feel free to stop and view the cattle at the ranch any time prior to March 11, 2020, or at Kist Livestock thereafter.

Sincerely,

L..J. & Janet Dohrmann

. **President SAV President 6847** was the world record and top-selling bull of the 2017 SAV sale at \$750,000 with a total valuation of \$938,500. Incredible in his structure and powerful in his design, we believe **President** is the best Charlo son out of the No. 1 income producing cow in SAV history, SAV Blackcap May **4136**.

Cowboy Up has more growth performance than any bull we have ever produced and is also extremely docile. **5405** is as wide topped, deep sided, long bodied, wide based kind of bull as you will find. He looks like he would sire progeny that could live outside in the big country and excel in all the traits that keep ranchers in business. He has lived up to our expectations. The name, **Cowboy Up**, just kind of fits, as this bull has done everything we could have hoped for and more. Balanced trait qualities at their best. 3 Sons Sell!

. A phenomenal young bull that has created excitement across the breed! He is an **outcross bull** for so many, that is fault free in his kind - Athletic, long, well-balanced, heavy muscled, clean and worlds of eye appeal. The reports on his calves are coming in and are very exciting, some even say the best they have.

Featured as the \$22,000 lead off and top-selling bull of the 2015 Island Cattle Company Bull Sale, this moderate Birth Weight EPD young sire with elite percentile rankings for Weaning Weight EPD and Yearling Weight EPD has an impressive phenotype and the look of a herd sire. The dam of this young stud balanced a birth ratio of 96 with a weaning ratio of 102 on her first four natural calves with two yearlings recording an average ratio of 105. 2 Sons Sell!

ROCK STAR excelled in the overall 2013 born Fall calf crop at SydGen, posting the Number 2 adj. WW at 883 lbs. to ratio 122, the Number 1 adj. YW of 1,536 lbs. to ratio 120, and the Number 3 adj. weaning weight. REA of 18.5 sq. in., from the original 200 bull calves weaned from five different contemporary groups.

A favorite of all who have seen him, ROCK STAR topped the 2014 Syd-Gen Production Sale at \$60,000 for half interest and half possession to a top group of breeders from the Dakotas. 3 Sons Sell!

“Bulls left for wintering will have a semen evaluation before delivery!”

Table 1. Progeny equivalents (PE) – Carcass trait PE equate to actual carcass harvest data not ultrasound scan equivalents.

Trait	PE	Trait	PE
Calving Ease Direct	28	Heifer Pregnancy	14
Birth Weight	21	Calving Ease Maternal	18
Weaning Weight	26	Milk	33
Yearling Weight	21	Mature Weight	11
Dry Matter Intake	8	Mature Height	8
Yearling Height	11	Carcass Weight	9
Scrotal Circumference	13	Carcass Marbling	9
Dodility	10	Carcass Ribeye	12
		Carcass Fat	10

Expected Progeny Differences (EPDs) are provided by the American Angus Association to provide valuable information on registered Angus cattle for important traits such as calving ease, growth, and marbling. The challenge with EPDs is that on younger and unproven animals, EPDs are not as accurate. This sometimes results in a bull or heifer not performing to the cattle producer's expectation. For example, a commercial producer may purchase a bull with a high weaning weight EPD, but be disappointed in the lack of growth by the bull's progeny.

In recent years researchers have worked diligently to identify the genetic contribution of various DNA markers. By incorporating this DNA information into the EPDs, the American Angus Association is able to provide much more accurate EPDs called “genomic-enhanced EPDs (GE-EPDs). This technology has advanced considerably in just the past couple years. When an animal is profiled on the **Neogen-GeneSeek GGP-LD**, the EPD accuracies are equivalent on several traits to as if the profiled animal has 12 or more progeny.
