Location: Veltkamp Livestock Feedlot, 1393 Kuipers Rd, Manhattan, MT

Welcome Fellow Cattlemen, Friends & Neighbors,

Thank You for your interest in and support of our program. We couldn't (and wouldn't want to) do it without you!!! Nothing makes our day brighter than a success story from our customers. You've heard the saying "Your Success is Our Success"; well, it's true. The BEST part of this life is its relationships – and we have been blessed with the best! We are excited to present the most complete set of bulls that we have ever produced!!! Please join us on March 21, 2019 at Veltkamp Feedlot for our 7th Annual Bull Sale. We will have Cinnamon Rolls and coffee waiting for you in the morning; then lunch at noon; followed by the sale at 1 p.m. We will be available to answer any questions prior to the sale. Our herd is backed by 50 years of breeding reputation cattle through high standards of genetic selection and constant improvement, sustained by the help of Christ our Savior, relentless stewardship and new technology. We have no interest in being the biggest; we are trying to be the best, most reliable, most trusted source of Red Angus genetics. Thus our slogan: "Breeding the Best – Cutting the Rest".

In addition to our Faith, our next greatest strength is being a family run operation who handles our own cows; having personal knowledge of...and experience with...each and every cow in the herd. Utilizing only exceptional cows to build a herd and produce bulls. Here at KRA, we identify those traits and build on them using proven cow families. "Convenience traits" are those cattle traits that contribute directly to savings in time, facilities, drugs and labor. What was once considered convenience traits have taken on a new meaning – they are the difference in the life and health of both the cattle and the cattleman. Disposition, structure, mothering ability, calving ease, udder structure, foot structure, fleshing ability, calf vigor, all make a difference in the longevity of the cattle and the cattleman. Calving out over 200 cows, we cut deep to bring you the best of the best; and eliminate any problems. This philosophy increases the probability of buyer satisfaction; along with persistently building our superior cow herd. Through this process, we are able to select for more fertility and longevity; maintaining integrity in our program. We are deeply invested in breed improvement; not just number values. We want to insure that you, our friends and customers have the best resources to propel you to the next generation of cattle breeding and marketing. We encourage you to utilize all your marketing resources: Feeder Calf Certification, Top Dollar, Allied Access, and many more – if you aren't familiar with these programs, please ask and we will connect you.

All the bulls in the pen are contemporaries. Our daughter (owner of green tag bulls) takes all our photos. Although she may have removed some straw and mud; she DOES NOT use photoshop to alter the animals in any way. Feet have not been trimmed.

Most of our pasture is in the hills/mountains, so these guys know how to grub and must be structurally correct to survive – no irrigation, no creep – just mama's milk, grass and water. Since they were weaned last fall, they have been in the capable hands of Phil Veltkamp and crew; where they have been fed a mixed, high-roughage ration (we shoot for an average 3#/day gain). All bulls have been ultra-sound carcass tested, fertility tested and met soundness exams. In addition, they are current on deworming and vacs including foot rot. Adding accuracy and helping to identify their potential heritability; we RA50K tested these guys....more data, but no silver bullet. EPDs are just a TOOL. Like everything else, they are a work in progress and change constantly with more information to the database. There are many important traits that have no EPD system in place (the phenotype and convenience traits) – that's where the "added value" of personal "cow knowledge" and integrity of the breeder play essential roles.

We have chosen to list actual BW. That being said, 1st calf heifers typically have calves that weigh 7# less than if they were mature; 2nd calvers are typically down by 4#. The reverse is also true: If a 3-10 yr old were a first calf heifer, her calf would typically weigh 7# less using the same mating. BW influences CE by 65%. Between environment and genetics; the female is responsible for 60-70% of the BW of the calf; whereas the sire is responsible for 30-40%.

We welcome you to browse through the bulls prior to sale day (give us a call and we'll come down and meet you). You are also invited to view their dams here at home prior to sale day. Let us know if we can be of any help – if you have any concerns, ASK US; our intention is to be transparent and give you every bit of information. We look forward to seeing you at Veltkamp Feedlot on Sale Day, March 21, 2019.

Until then, God Bless & safe travels.

Dave, Kay & the Crew

Klompier Red Angus Annual Bull Sale

March 21, 2019 • 1pm MST • Manhattan, MT

Auctioneer:

Garth Isbell: 406.224.1158

Sale Representatives:

John Goggins: 406.698.4159 (Western Ag Reporter)

Scott Fraser: 406.860.6548 (Frontier Live Sale)

Sam Fraser: 406.860.0590 (Frontier Live Sale)

Scott Perkins: 406.560.2589 (Headwaters Livestock)

Katie Ochsner: 307.575.6802 (RAAA)

Sale Day Phones:

406.581.4043 - Dave's Cell

406.581.2126 - Kay's Cell

406.599.5334 - Kara's Cell

Sale Location:

Veltkamp Livestock Feedlot

1393 Kuipers Rd, Manhattan MT

Veterinarian:

Dr. Bruce Sorensen & Dr. Nick Johnson

Sorensen Veterinary Clinic • 406.388.6275

Sale Order:

Cattle will sell in catalog order, but are subject to change on sale day

Supplemental Information:

Scrotal measurements and ultra-sound carcass data will be available on sale day

Delivery:

Pick up your bulls on sale day or the following day and receive \$50 off each bull purchased. Free shipping up to 300 miles from Manhattan, MT. Klompier Red Angus will assist in making delivery arrangements at cost. All deliveries are at the buyer's risk.

Genetic Defects:

All known cattle with a genetic defect have been tested and/or eliminated from the Klompier Red Angus herd.

Klompier Red Angus Guarantee:

All bulls that are in good breeding condition at the beginning of the first breeding season are guaranteed breeders. This does not include any injury. All claims for adjust or refund must be made within the first six months of the sale date. All bulls are guaranteed breeders.

Video:

Available to preview on www.frontierlivesale.com and www.dvauction.com

Internet Bidding:

Frontier Live Sale & DVAuction

Sale Catalog:

MandyPants Designs, Kara Herbst & Ballyhoo Printing

Sale Terms & Conditions:

Any terms and conditions not covered by the catalog will refer to the Standard Terms & Conditions set forth by the Red Angus Association of America. Terms of the sale are cash unless other arrangements have been made.

Liability:

Announcements made by the seller on sale day will take precedence on any statements in the catalog. All persons attending the sale do so at their own risk. Seller/Manager assumes no responsibility, legal or otherwise, for any accidents occurring in, on, or about the premises.

Retained Interest:

Klompier Red Angus is retaining 50% semen interest in all bulls.

EPDs:

All EPD's in the catalog are current as of 2/7/2019.

RED ANGUS GUIDE TO EPDS

Ranch Tested. Rancher Trusted.

Red Angus

HerdBuilder (HB)	The probability of developing profitable cowherd traits while maximizing the value of marketed progeny
GridMaster (GM)	The probability to increase the value of marketed calves
Calving Ease Direct (CED)	The probability of calves being born unassisted out of 2-year-old dams
Birth Weight (BW)	Difference in weight for progeny at birth
Weaning Weight (WW)	Difference in weight for progeny at 205 days of age
Yearling Weight (YW)	Difference in weight for progeny at 365 days of age
Average Daily Gain (ADG)	Difference in daily gain between 205 and 365 days of age
Dry Matter Intake (DMI)	Difference in feed intake for animals during the post-weaning growth period
Milk	Difference in weight of a daughter's calves due to the maternal environment provided by the dam
Maintenance Energy (ME)	Difference in maintenance requirements for mature females
Heifer Pregnancy (HPG)	Probability of a female conceiving and calving at 2 years of age
Calving Ease Maternal (CEM)	The ability for daughters to calve unassisted at 2 years of age
Stayability (STAY)	The probability of a female remaining productive in a herd until 6 years of age
Marbling (MARB)	Difference in carcass marbling scores
Yield Grade (YG)	Difference in USDA yield grade scores
Carcass Weight (CW)	Difference in hot carcass weight
Rib Eye Area (REA)	Difference in carcass rib eye area between the 12th and 13th rib
Back Fat (BF)	Difference in carcass fat depth between the 12th and 13th rib

Top Dollar Angus Feeder Program

Top Dollar Angus is a genetic-certification and marketing company focused exclusively on the top 25% of the industry in carcass and growth Angus and Red Angus-influenced feeder cattle. Top Dollar Angus is a program similar to other popular branded-beef programs, except that Top Dollar Angus does its "branding" in the feeder cattle and calf market.

Qualified herds must have two or more generations of Angus (Black or Red) genetics with growth and carcass traits objectively ranking in the top 25% of the breed based on documented historical sire use. DNA evaluation, conducted by Zoetis or GeneSeek, is another workable method to qualify. Once your cattle have met the necessary requirements, they will be marketed under the Top Dollar Angus brand and logo, and will be promoted aggressively to a large number of feed yards and buyers. In today's market, Top Dollar Angus cattle are seeing premiums ranging from \$30 to \$70 per head above the average market.

Why the premium? Cattle feeders know that Top Dollar Angus cattle perform better and have higher grid-based carcass rewards compared to other cattle. This puts more dollars per head into the cattle feeder's pocket, which can be passed back to the producer in the form of premiums paid above market price.

Top Dollar Angus helps take the guess work and surprises out of growing and feeding cattle. Feed yards are tired of unpredictable performance and wide-ranging profitability results from group to group on cattle they purchase. Cattle often look the same and have the same colored hides, but are very different genetically. That's why the genetic certification of high-end Angus and Red Angus feeder cattle is here! The industry must differentiate the best Angus and Red Angus genetics from average cattle, and that's what Top Dollar Angus will do for you!

If you have consistently invested in high-performance Angus or Red Angus genetics, Top Dollar Angus will make your cattle stand out from the pack and get you the premiums you deserve. No matter how you market your cattle, our goal is to create more demand and higher prices for your calves.

Jared Wareham, general manager

Research Validates Red Angus as Most-Favored Female

Ranchers across the country have long recognized the value of Red Angus females as the foundation of a profitable cowherd. Now, independent research validates those years of cattle production experience with tangible data proving the Red Angus heifer's worth.

Research Confirmation

Esther McCabe, et al., of Kansas State University, led a study that confirmed Red Angus are the most-favored female in the industry. McCabe and her team compiled five years' worth of pricing data from Superior Livestock Auction, comparing 13,804 lots of heifer calves totaling over 1.2 million head that sold in 116 video auctions.

The research team evaluated the effects of independent variables on the sale price of heifer calves that fell into six different breed composition groups: English, English crosses, English-Continental crosses, Black Angus-sired out of dams with no Brahman influence, Red Angus-sired out of dams with no Brahman influence, and Brahman-influenced.

They deduced that Red Angus-sired heifer calves bring \$5 to \$9 more per hundredweight than all other breed types.

Rancher Trusted

While market research validates the price advantage of Red Angus heifers, ranchers have tested and trusted her worth on the range for years. Red Angus females are desirable as replacement heifers because they mature into productive mother cows that reward producers with extra dollars in their pockets on sale day.

Red Angus cows have gained ranchers' trust as a complete package through fertility, fleshing ability, good disposition, longevity and excellent overall production. They produce feeder calves that earn premiums in the yard and on the rail through docility, feed efficiency, conversion and carcass merit.

Over the years, stockmen have voted with their checkbooks, purchasing heifers they know will bring profitability to their ranching businesses – and Red Angus females are their most-favored choice. ■

Independent research studying five years of Superior Livestock Auction data confirms the value of Red Angus replacement females.

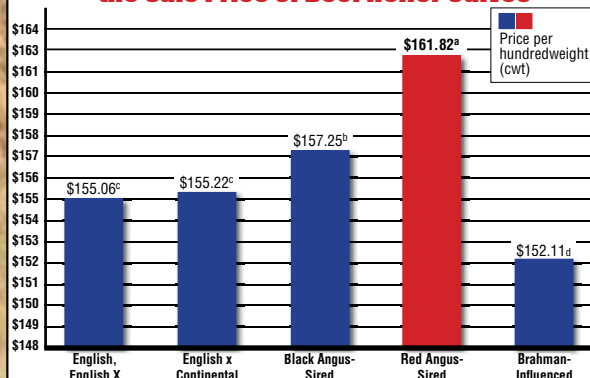

Red Angus Stockyard

List or locate quality Red Angus replacement females at stockyard.redangus.org. Over 20,000 head of cattle are sold each year through the Red Angus Stockyard.

FeMail

An electronic tool to help locate or market ranch-tested replacements. Market your open heifers, bred heifers or cows, or cow-calf pairs. FeMails are designed for offerings of 25 head of more to complement listings on the Red Angus Stockyard.

Breed and Gender Interact to Affect the Sale Price of Beef Heifer Calves*

Red Angus Marketing Programs

The FCCP is the first step in differentiating your cattle from others to buyers, feedlots and packers.

What is the Feeder Calf Certification Program?

Producers utilize the Feeder Calf Certification Program (FCCP) to enroll calves in the industry's first genetic, source and age USDA process-verified program (PVP).

With many age and source verification programs to choose from, it's important to realize that Red Angus has the only PVP to hold the marketing claim of traceability to at least 50 percent registered Red Angus bloodlines. The genetic claim of the FCCP allows calves to access many Angus product lines. USDA provides certification of meat carcasses for a number of marketing programs that make claims concerning breed and carcass characteristics. Packer product lines making an "Angus" genetic claim require documentation from USDA verifying their Angus genetics, like the FCCP Certificate of Compliance.

How to enroll your calf crop in the Feeder Calf Certification Program

1. Contact Red Angus at (940) 387-3502 to go through a short supplier enrollment questionnaire over the phone. Red Angus will ask general management, animal identification and breeding questions. If needed, additional documentation on breeding may be needed such as semen documentation, lease agreements or information on purchased bred females.
2. After all documentation is recorded, Red Angus will have the tags shipped directly to the producer. Tags need to be applied prior to the calves leaving the ranch of origin.
3. The producer will receive a customer enrollment agreement to fill out and return with a copy of your calving records.
4. Upon return of your customer enrollment agreement and calving record, Red Angus will issue your USDA-approved certificate of compliance.

Red Angus FCCP
GENETICS + SOURCE + AGE

• Traceability to at least 50% Red Angus Bloodlines
• Source Verified to Ranch of Origin

Extremely attractive; this soggy, good natured, calving ease chap stems from the Dazzle Cow family. His dam has the bragging rights to a 103.2 MPPA on her very first try. He claims 8 EPDs in the top 1/3 of the breed boasting low maintenance with high fertility, performance (108 WR and 102 YR) and marbling 5.38 IMF index (118 IMF ratio). Bred to withstand the test of time; his maternal great grand dam is still producing in our herd at the age of 13. That's the beauty of the Dazzle Cow family influence.

Birth Date	Reg. #	Category
1/27/2018	3906145	100% 1A

Bold in presence yet quiet in nature. With his extra length, structure and capacity; this cherry red fella is bound to turn some heads. Now, take a look at the rock solid cow families represented in his pedigree. The last 5 generations have only A.I. matings – that's a true testament for fertility. Coming out of the blocks at 79#, he turns up the heat and boasts a WR & YR of 102. 10 EPDs in the top 1/3 of the breed. Use him to produce top end progeny: be it as replacements or on the rail.

4 CK The General 845

Birth Date	Reg. #	Category
1/27/2018	3938527	100% 1A

Talk about a smooth made, powerhouse bull with an awesome presence. CK The General 845 is going to shatter some of the breed expectations. 10 EPDs in the top 20% of the breed. A 14.39 in ribeye, gaining 3.6 lbs a day, a 106 WR, and 106 YR this young bull is going to have his calves tip the scales each fall. He stems from the Feddes Lakina cow family – and his beautiful young mama does an outstanding job every single year. Don't miss out on a chance to change the breed with him!

Even though this guy started out at only 70#, he is competing the "big boys" – posting a 3.31 ADG isn't too shabby for a "heifer bull". His bragging rights include 11 EPDs in the top 34% of the breed with ADG in the top 3% and CW in the top 1%. His fancy, moderate framed, perfect udder & feet Auburn family dam is quickly becoming a family favorite.

Loaded with class; this soft made, deep coated, moderate-framed boy is an ET out of our Auburn P35 donor; easy-fleshing, productive, picture-perfect udder, and never needed her feet trimmed (14 yrs old). The extra length, dimension and structure of this bull are what we are striving for. Expect to be impressed. He's following in his mama's footsteps; loads of capacity, eye appeal, correctness and easy fleshing.

No wonder Nexus progeny are in such demand. Excellent Disposition, plenty of length, capacity and structure, large testicles; and an overall high quality package. Starting out at 61# (best 15% BW) this fella has done quite well for himself; posting a 3.5 ADG and claiming the top 17% ADG EPD. Note his REA is in the top 2% and YG in the top 6%. Additionally, the maternal matrons run deep in this pedigree.

If disposition, performance, muscle, length, depth, structure and carcass traits are among your priorities; then take a look at this handsome dude. Sporting a 111 WR, 107 YR, 106 REA ratio (13.79"). On the maternal side; he heralds the Auburn cow family. His mama sports a 103.6 MPPA. Paternally; the amazing NEXUS who has built a reputation for structure, disposition, feet and udder quality.

11 DKK Incredibly Packed 863

Birth Date	Reg. #	Category
1/30/2018	3906103	100% 1A

Here's the powerhouse of the pen – that being said, he started out at only 86#. This gentle natured, high-performing stud claims 9 EPDs in the top 22% of the breed with 5 of those in the top 2%. What's more, his WR is 109, YR is 117, Ribeye ratio is 109 (14.14 square inches) and ADG is 4.2. Affirmed by great cow families; and 5 generations of only A.I. breeding; using an impressive sire lineup. An outcross for many pedigrees. Utilizing his pedigree; it's no wonder that he has amazing length, thickness and depth. Additionally, he has impeccable foot and leg structure, a fantastic disposition.

Just like good whiskey – Smooth, Bold & Quiet. Many compliments to his fabulous dam (pictured below). Excellent feet, udder, capacity, disposition and mothering ability. Now, let me introduce you to the sire, Loosli Manhattan: He has amazing feet, an excellent disposition, his daughters are fabulous momma cows and he is bar none one of the best bulls we have ever purchased.

If I were a bettin' man; I would bet that you are going to fall in love with this guy. So many wonderful qualities: Super deep, extra long & thick, quiet natured, fantastic foot and leg structure... and oh boy does he know how to carcass and pack on the pounds: 110 WR, 113 YR , 4.1 ADG followed by a set of EPDs that reflects the same; 8 EPDs in the top 13% of the breed with 9 in the top 1/3. He scanned a 14.66 inch ribeye. His young mama (already claiming a 105 MPPA) is a family favorite for structure, disposition, spring of rib and simply an incredibly beautiful cow.

24 DKK Independence 890

Birth Date	Reg. #	Category
2/4/2018	3906095	100% 1A

With a 4.27 ADG --This extra-long, clean-made, super cool stud has challenged the growth curve to the max (92 BR to a 110 YR). Following in his mama's highly fertile, high-capacity, flawless structured footsteps; he has the potential to be a breed leader. His pedigree is heavily weighted with maternal greatness. Additionally, he scanned a 106 IMF ratio and a 12.62 inch ribeye.....and claims 12 EPDs in the top 1/3 of the breed.

Extra length of spine always pushes down the scale – and in the case of 8178, that extra length puts him in the top 2 & 3% of the breed for performance traits. Not only are his calves expected to grow like crazy, but they are also expected to have that extra milk to keep them fed and stayability to keep them in your herd a good long time. A quiet tempered bull with extra length and leg.

Loaded with class; this soft made, deep coated, moderate-framed boy is an ET out of our Auburn P35 donor; easy-fleshing, productive, picture-perfect udder, and never needed her feet trimmed (14 yrs old). The extra length, dimension and structure of this bull are what we are striving for. Expect to be impressed. He's following in his mama's footsteps; loads of capacity, eye appeal, correctness and easy fleshing.

A standout since birth & stacked deep with Klompjen maternal genetics. 8102 is the result of blending elite cow families. If you want to improve your herd, this high performing, quiet natured, good looking, highly capacious, structurally sound bull is the place to start. Eleanor 275 is one of the most structurally flawless, balanced and beautiful cows I have ever seen and she boasts a 106.2 MPPA. Performance! 106 YR ramped up to a 111 YR – he started out with only a 82# BW. Top 12 and 15% for WW, YW & ADG. This fella is in the top 9% of the breed for Stay, 12% REA, 14% CW and 19% HB.

Stacked with Klompier Genetics. Mating the best to the best produces this kind of quality: Thick, long, structurally correct and as added bonuses; quiet natured with a deep red coat. Loaded with cow families that have proven themselves time and time again with foot structure, udder quality, fleshing ability, mothering ability and performance. This one should be on your "must have" list.

That extra length of spine always packs on the pounds – no wonder this guy claims a 3.82 ADG. Moderate framed and LOADED with maternal; 8138 claims the Impress cow family, but also has strong ties to the Ramblin Rubys, Starlettes and Angie Roses (on the paternal side). Dam's MPPA 103.4 – she's not still in our herd at 11 years old without just reason – she's a good one!!!

If you sell your calves by the pound, 8191 should spike your interest: top 12% of the breed for CW, top 10% for WW, top 30% for YW and top 20% for REA. Additionally, this guy has a great disposition, he's extra long, clean and smooth.....and did you see his dam? She's amazing – definitely a family favorite. A phenotypically flawless, good natured, broody mama cow.

Dam of Lot 51: DKK Harmony 274

Renee bringing the cows in on Sister

52 DKK Redemption 827

Birth Date	Reg. #	Category
1/25/2018	3906349	100% 1A

You may be wondering why we mate Redemption to our Auburn cow family so often – Well...Because it works to produce low maintenance, easy fleshing, powerful, structurally correct cattle!!! You get the calving ease that explodes with performance. This guy started out at 71# and then burst at the seams to post a 103 WR – giving his young dam a 101.2 MPPA; and her dam posts a 106.77 MPPA. What's more: he scans a 6.16 IMF (ratioing 136) and a 12.26 inch ribeye (guess his EPDs haven't caught up with that quite yet). He has a little more of a nervous nature than most of our bulls.

Merging Calving Ease, Performance; this gentle-natured, handsome bull starting life with a 67# BW top 1% of the breed for CED and then top 1% CEM. Sport the top 34% WW, 3% YW. No wonder his sire, has built such a reputation.

56 DKK Captain Incredible 8114

Birth Date	Reg. #	Category
2/10/2018	3906133	100% 1A

This Captain Incredible son really doubles down on the carcass traits: GM in the top 6%, YG top 22%, CW top 2% and REA top 5%. Added to his performance and quiet disposition; this long gorgeous dude should add some value to his calves at weaning. Incidentally; this guy is also covering the maternal matron bases – boasting the Angie Rose, Ramblin Ruby, Starlette and Lakota cow families in 3 generations of his pedigree and the Dixie cow family in the 4th generation.

*Thank you for your continued support of
Klompier Red Angus.*

Our Customer's success is Our Success!

THE POWER OF 50K

Bull selection is one of the most significant decisions ranchers make in terms of influencing the overall profitability of their operations; therefore, Red Angus strives to deliver reliable genetic predictions to stakeholders to ensure producers are making the most informed decisions possible in pursuit of production goals.

For years, ranchers utilizing Red Angus EPDs (Expected Progeny Differences) in their selection decisions have enjoyed the built-in reliability and risk reduction provided through the breed's early adoption of Total Herd Reporting (THR) data. To further advance EPD accuracy and reliability, Red Angus can now incorporate 50K genomic data.

For generations, animal breeders have relied on phenotypic measurements to determine what the animal possesses at the gene level. Now, with the inclusion of 50K genomic data, we can actually measure the impact of identified gene effects before the weight or measurement is ever recorded.

Accuracy

EPDs predict an animal's true genetic merit which can be passed on to offspring. As the amount of data included in an animal's EPD calculation increases, ranchers can have more confidence that the EPD correctly identifies the animal's true genetic merit. This is communicated to stakeholders in the form of "Accuracy," which is printed in conjunction with each EPD and ranges from 0 to 99.

Increased Data = Increased Accuracy = Increased Reliability

The power of 50K is the ability to collect additional genetic prediction data before an animal is selected to enter or exit the herd. Thus allowing producers to achieve their genetic goals at a faster rate as the genetic predictions used in selection decisions are of higher accuracy.

Red Angus' 50K test proves to be a game changer

- Ensure your yearling heifer bulls are "calving-ease specialists."
- Confirm your cowherd-building bulls have optimal genes for maternal traits.
- Make certain your carcass bulls are superior grid producers.

Information gained from 50K genomic data and Total Herd Reporting data provides Red Angus stakeholders with EPDs of unsurpassed reliability.

Ranch Tested. Rancher Trusted.

Klompfen Red Angus Recipe 2019

Oatmeal Raisin Cookies

3/4 cup softened butter
3/4 cup white sugar
3/4 cup brown sugar
2 eggs
1 tsp vanilla
1 1/4 cup flour

1 tsp baking soda
3/4 tsp cinnamon
1/2 tsp salt
2 3/4 cup rolled oats
1 cup raisins

Preheat oven to 375 degrees F

Cream together butter, white sugar, & brown sugar until smooth. Beat in the eggs & vanilla til fluffy. Stir in flour, baking soda, cinnamon, & salt. Then stir in oats and raisins.

Bake for 8 to 10 minutes or until golden brown.

ENJOY!
